I came to know Workineh when I was his instructor for the course Geotechnical Engineering. He was the best student in my class. Overall, he is highly intelligent and has good analytical skills. His overall intelligence is also reflected in his grades for the course, which were by far the best in the class. He has excellent communication skills. His written work in course assignments is both clear and concise, as well as interesting to read.

-He was highly proficient in applying the course material in analyzing the problem situations. He always explained his views very concisely and gave supporting arguments that were both clear and persuasive. He also demonstrated good teamwork skills in group assignments. At a personal level, Workineh is a well-disciplined, industrious student with a pleasant personality. Throughout the course, he demonstrated great perseverance and initiative.

It is with much enthusiasm that I recommend Mr. Tegegne Workineh Liyew, whom I taught in the course of Location and design of railway and supervised in his graduation design at Southwest Jiaotong University (SWJTU). While delivering the course of Location and design of railway, I was consistently inspired by his dedication, interaction with me and his classmates. Mr. Workineh is a hard-working student who loves asking questions and is eager to learn new knowledge. In his last semester, he was working hard on his graduation design. He has proven himself to have the perseverance, initiative, and intellectual creativity necessary to complete an undergraduate degree.

So, in this letter, I regard his choice to further extend his study and research at MSc level being sure that he will be a productive student at the end. I give him my highest recommendation and for further information, you can contact me via my email address.
